Teva

CHANNELS

B2B,B2C

BUDGET CAP

115000000

CURRENCY

USD

✓

Enforce holiday blackout (Nov 1 – Jan 15)

Blocks production cutovers during peak retail season. Disable if your rollout isn't impacted.

Check feasibility

SCENARIOS

Order Management — Canada (Teva)

CA · Teva · B2B · B2C

Prove Canada rollout works while decoupling EBS from B2C order flow.

Primary risk:

Split-brain order ownership + ATP/ATS contract drift during dual-run.

Decision:

MFCS-first vs direct integration (EBS demotion strategy).

Owner · Ralph / Jesse

5 stages

34 stores

10 conflicts

Finance — Demote EBS to Ledger

CA · Teva · B2B · B2C

Keep financial posting correct while removing EBS from the live order path.

Primary risk:

COGS/revenue timing mismatch if posting happens before fulfillment confirmation.

Decision:

Posting timing: post-ship async vs near-real-time with controls.

Owner · Raj / Finance

4 stages

10 conflicts

Commerce — Bridge Pricing (Temporary)

CA · Teva · B2B · B2C

Deliver pricing/promo wins early without replatforming everything first.

Primary risk:

Middleware 'temporary' components become permanent; frontend logic debt.

Decision:

Explicit retirement date + kill-switch for bridge components.

Owner · Commerce Lead

2 stages

2 conflicts

Telemetry — Make Conflicts Visible

CA · Teva · B2B · B2C

Instrument the program so collision risk and cutover health are observable.

Primary risk:

Blind cutovers: no reliable signals for dual-run drift and latency.

Decision:

Minimum telemetry contract + event naming for order/inventory flows.

Owner · Platform

2 stages

No conflicts

Supporting Maneuvers — Readiness & Data

CA · Teva · B2B · B2C

Reduce surprises by grounding rollout phasing in store/region reality.

Primary risk:

Org topology + store footprint mismatch causes sequencing failure.

Decision:

Confirm store list + region ownership rules + blackout windows.

Owner · Program

3 stages

34 stores

5 conflicts

Future architecture roadmap

FY26 → FY28

Readiness and risk snapshots per lane.

FY 2 6

WAVE READINESS

Canada readiness + data slicing

FY26 WAVE 1

FY26 · M1 → FY26 · M3

CA

Brand/region store mapping, Canada process alignment validation, holiday blackout planning.

4 systems

2 integrations

WAVE B2C

Shared-change · High

B2C Canada go-live · EBS decouple

FY26 WAVE 4

FY27 · M3 → FY27 · M9

CA

Decouple EBS from B2C order flow, performance/scalability uplift, inventory visibility contract.

Overlaps with FY27 Wave 2 — 2 shared systems, 0 shared integrations (+1 more) (High)

FY 2 7

WAVE FOUNDATION

Shared-change · High

DOMS regional setup + returns sizing

FY27 WAVE 2

FY26 · M4 → FY27 · M3

CA

DOMS region provisioning, returns processing design, effort calibration.

Overlaps with FY28 Wave 3 — 2 shared systems, 0 shared integrations (+2 more) (High)

4 systems

3 integrations

WAVE OPTION CHECK

Shared-change · High

MFCS-first vs direct integration decision

FY27 WAVE 5

FY26 · M8 → FY27 · M2

CA

Compare architectural options, quantify integration effort delta, validate MFCS-ish contingency.

Overlaps with FY27 Wave 2 — 2 shared systems, 1 shared integrations (+1 more) (High)
